Personnel, Human Resources
Grupo SYASA

I am very interested in this position with SyASA Company and I believe that my education, experience and employment background are appropriate for this position. I am familiar with all National Lighting brands and International brand products also and I think, there are a good real technical and functional solutions for the lighting projects in Mexico with high quality and very simple and flexible to use.

I come from a background of 22 years of lighting and control design systems, I have got training in lighting design using software of different Manufactures Companies like Light Gear of Hubbell lighting, Luxicon of Cooper lighting, Cala of Holophane lighting and lighting controls like Vantage controls, Lutron controls, Lightolier Controls, etc.

I have the experience designing Lighting in all kind of building and constructions like Residential , Comercial Centers , Offices , Industrial , Hotels etc , and systems through companies representatives of the factory and I have worked managing factory sales people, I have the experience in specifying and working with specifiers of lighting & controls systems such as Consulting Engineers, Electrical Contractors, Architects , distributors and dealers.

I have the experience programming lighting control systems and installing them as well. I have a strong academic background of the Architectural spaces as well as lighting fixtures and use of the different kind of bulbs and control system designs

Enclosed is a copy of my resume, which more fully details my qualifications for the position. I look forward to putting my knowledge and experience in the matter into practice in the future projects in Syasa Company.

I will contact you in this week to see if you require any additional information regarding my qualifications.

Thank you for your consideration.

Sincerely,

Alma Ruth Casaos
